

**Cold seasons in Italy: explosion of emotions.**

The city parks as well as the Natural parks are an incredible sight to see. The Italian climate is very different from North to South and the same country can offer you spectacular days on the beach as well as having fresh snow on the ski slopes of the Italian mountains for sports lovers.

**You can chose which suits your taste.**

A drive through the Langhe area of Piemonte visiting wine producers and stopping for lunch in one of the incredible restaurants, visiting the historical cities and coastline where the weather is so moderate that a quick swim is often still possible in Autumn and in Winter.

The cities of art are an incredible draw in this cozy season, with museums to explore and lazy lunches and dinners in the intimate restaurants around the iconic cities.

We have chosen **three different ways to enjoy cold seasons in Italy.** We invite you to explore:

**BERNINA**

**FLORENCE**

**PIEDMONT**

**Trust us with your event, and you will not regret it!**
